1994 Article Index

This index lists articles published in *Semiconductor International* in 1994. Single issues are available for $10 each, or $15 outside the U.S., by writing to: Semiconductor International, 8773 S. Ridgeline Blvd., Highlands Ranch, CO 80126-2329. Reprints of single articles can be purchased in quantities of 500 or more by contacting Kim Leffew at (708)635-8800 or (800)323-4958.

PROCESSING

Forecast 1994: Experts See Imminent Need For Change; Ahmed Busnaina, Nathan Cheung, Mars Hablanian, Robert Kopp, Chris Mack, Robert McDonald, Venu Menon, Larry Plummer, Jon Turino, Evert van de Ven, Alan Wood; Jan., p.40.

Point-of-use Generation: The Ultimate Solution for Chemical Purity; Laura Peters; Jan., p.62.

Applying Cost Modeling to Stepper Lithography; Pieter Burggraaf; Feb., p.40.

Chemical-mechanical Polishing: A New Focus on Consumables; Peter Singer; Feb., p.48.

Inside Today's Leading Edge Microprocessors; Anthony Denboer; Feb., p.64.

Special Report: Semicon/Japan '93; Semiconductor World; Feb., p.70.

Cleanroom Apparel: A Question of Tradeoffs; Ron Iscoff; March, p.65.

Extending Silicon's Horizon Through UHV/CVD; B.S. Meyerson, H. Kaiser, S. Schultz; March, p.72.

How Particles Form During Vacuum Pump Down; Benjamin Y.H. Liu; March, p.75.

French Semiconductor Industry —Innovation à la Française; Adele Hars; March, p.95.

Directions in Dielectrics in CMOS and DRAMs; Peter Singer; April, p.56.

SEMI, JESSI, SEMATECH Drive Minienvironment Standards; Xavier Pucel; April, p.69.

SI Honors Top Fabs of 1994; Ron Iscoff; April, p.76.

Advanced Plasma Sources: What's Working?; Pieter Burggraaf; May, p.56.

Extending LOCOS-based Approaches for Sub-0.5 mm CMOS; P.U. Kenkare, J.R. Pfiester; May, p.64.

Vacuum Measurement: The Basics; Charles R. Tilford, J. Patrick Looney; May, p. 72.

Controlling Your Vacuum Process: Effective Use of a QMA; Robert K. Waits; May, p.79.

Keeping the 'RCA' in Wet Chemistry Cleaning; Pieter Burggraaf; June, p.86.

Cluster Tool Communications: MESC is Back; Peter Singer; June, p.94.

MOSFET Scaling in the Next Decade and Beyond; Chenming Hu; June, p.105.

Redefining the Standard Cubic Centimeter; Dan LeMay; June, p.119.

Semicon/Europa '94 Reaches for the Summit; Adele Hars; June, p.127.

Pulsation Dampening Techniques to Reduce Particle Counts; Charles A. Myers; June, p.137.

An Introduction to SRC University Research; Robert M. Burger; June, p.153.

Growth of Silicon Cost and Resulting Changes in Manufacturing Paradigms; Wojciech Maly; June, p.158.

Look for 'Everything Under the Sun' at Semicon/West; Ron Iscoff; June, p.169.

Thin Film Pitting: Is NMP the Culprit?; Dr. Franco T. Lee, Dr. David R. Wanlass, B. Walsh; June, p.175.

Flat Panel Displays: An Interesting Test Case for the U.S.; Peter Singer; July, p.78.

Building a Domestic Infrastructure for Large Area Processing; Scott Young; July, p.102.

Bulk Chemical Delivery: Does It Impact Yield?; Ron Iscoff; July, p.108.

Using Factory Simulation: 'Virtual' Wafer Fabrication; Pieter Burggraaf; July, p.120.

Solving SECS Automation Problems; Ken Lloyd; July, p.128.

Dielectric Planarization for VLSI and ULSI Applications; Gordon Grivna, Kelly Kyler; July, p.134.

Planarization by CMP: Forecasting the Future; William C. O'Mara; July, p.140.

A Simple New Yield Model; W. Maly, H.T. Heineken, F. Agricola; July, p.148.

Ultrapure Water: A Battle Every Step of the Way; Robert A. Governal; July, p.176.

CVD TiN for Sub-0.5 mm Technology; Karl Littau, G. Dixit, R. H. Havemann; July, p.183.

O-rings in Etchers: Little Things Mean A Lot; Carmel Ish-Shalom, Dalia Vernikovsky; July, p.187.

Playing the Survival Games for 256Mb, 1Gb Stakes; Semiconductor World; July, p.191.

Japan Sees Enhanced Vitality with 64Mb Technology; Semiconductor World Staff; July, p.197.

Get Out Those Walking Shoes, Semicon/West '94 Is Here!; Ron Iscoff; July, p.204.

A Look at the Best of Metal Etch Capabilities; Pieter Burggraaf; Aug., p.46.

The Interconnect Challenge: Filling Small, High Aspect Ratio Contact Holes; Peter Singer; Aug., p.57.

Silicides for High Density Memory and Logic Circuits; Josef Winnerl; Aug., p.81.

The Problem of the 'Easy' Vacuum Specification; Charles E. Bryson III; Aug., p.90.

Improve Your Sputter Process by Better Water Vapor Pumping; Don Friede, Philip Lessard; Aug., p.95.

What's Available in Deep-UV Resists?; Pieter Burggraaf; Sept., p.56.

Effective Gas Handling: A Balance of Cost and Purity; Peter Singer; Sept., p.64.

Static Charge: It's a Killer!; Arnold Steinman; Sept., p.73.

How Gas Panels Affect Contamination; H. Kobayashi; Sept., p.81.

Applications of Cost-of-ownership; Daren L. Dance, David W. Jimenez; *1994/1995 Technical Products Reference Source*, Vol. 17, No. 11; Sept., p.6.

TCAD Set for Broader Application; Pieter Burggraaf; Oct., p.52.

European Project Develops Phase Shift Masks for Industry; Brian Dance; Oct., p.61.

Are Ion Implanters the Newest Clean Machines?; Ron Iscoff; Oct., p.65.

New Advances in Turbomolecular Pumps; Peter Singer; Oct., p.77.

Analysis of Non-normal Process Distributions; Michael Page; Oct., p.88.

New Interconnect Materials: Chasing the Promise of Faster Chips; Peter Singer; Nov., p.52.

What's Driving Resist Dry Stripping?; Pieter Burggraaf; Nov., p.61.

New European Chrome-on-quartz Photomask Standard; Brian Dance; Nov., p.69.

European SOI Comes of Age; Brian Dance; Nov., p.83.

Statistical Process Control in Microelectronics Manufacturing; William A. Levinson; Nov., p.95.

PFCs and the Semiconductor Industry: A Closer Look; P. Maroulis, J. Langan, A. Johnson, R. Ridgeway, H. Withers; Nov., p.107.

Editors' Choice: Best Products of 1994; SI staff; Dec., p.43.

Europeans Developing a 5X Reticle Technology; Brian Dance; Dec. p.63.

The Greening of the Fab; Ron Iscoff; Dec., p.67.

DI Water Filters: The Last Defense Against Microcontamination; Peter Singer; Dec., p.77.

Advanced SiO_2 Planarization Using Silane and H_2O_2; C. D. Dobson, A. Kiermasz, K. Beekman, R. J. Riley; Dec., p.85.

ASSEMBLY

Trim and Form: The Squeeze Is On; Ron Iscoff; Jan., p.54.

The Case for Multichip Modules; Dr. Daryl Ann Doane, Dr. Paul D. Franzon; April, p.85.

Ultrathin Packages: Are They Ahead of Their Time?; Ron Iscoff; May, p.48.

Choosing the Right Wire Bonding Capillary; Beni Nachon; June, p.149.

Epoxy Die Attach: The Challenge of Big Chips; René J. Ulrich; Oct., p.101.

High Volume Wire Bonding: (Nearly) Full Speed Ahead!; Ron Iscoff; Nov., p.73.

TESTING

Is 0.5 μm the End of the Line for Optical CD Measurement?; Ron Iscoff; Feb., p.56.

10 Significant Trends in SEM Technology; Laura Peters; March, p.50.

Thin Film Metrology: Headed for a New Plateau; Pieter Burggraaf; March, p.56.

Pursuing Advanced Metrology Solutions; Pieter Burggraaf; April, p.62.

What's in the Cards for Wafer Probing?; Ron Iscoff; June, p.76.

New Ways to Characterize Thin Films; Paul K. Chu, Richard S. Hockett; June, p.142.

Distinguishing COPs from Real Particles; Etsuro Morita, Hitoshi Okuda, Fumio Inoue; July, p.156.

Detecting Killer Particles on Rough Surfaces; Rebecca S. Howland; July, p.164.

In-situ Deposition Rate Monitoring for Thin Films; Ron Iscoff; Aug., p.69.

Advances in Epitaxial Deposition Technology; Alan G. Thompson, R.A. Stall, Bill Kroll; July, p.172.

Testing Known-good Die: Practical Solutions at Last!; Howard Green, Fariborz Agahdel, Tony Gucciardi; Sept., p.48.

Patterned Wafer Inspection: Now Required!; Pieter Burggraaf; Dec., p.57.
